<http://lifeedited.com/>

March 16, 2018

## Introduction

LifeEdited Maui is a model for how we can innovate to live in the future. So it is \*full\* of interesting things. The description below is just a start. We'll also be publishing content about each of the major systems in the house. For instance, the solar energy system, the transforming furnishings, the eco friendly materials, the indoor-outdoor system, the kitchen & appliances, the lighting, and the technology. We expect to publish at least 20 articles. Look for those articles in March and April 2018.

## Solar energy system

<p><a href="#">Blue Planet Energy</a> <b>Blue Ion 2.0 Energy Storage</b></p>	<p>Solar panels are great, but we need power at night. We wanted to find a company that shares our vision of leaving the planet better than we found it. Happily, our island neighbors Blue Planet Energy share this vision. The Blue Ion 2.0 Energy System that they created sets the bar for performance, safety, and reliability.</p>
<p><a href="#">Sunflare</a></p>	<p>Can solar panels actually look good? Sunflare's solar panels blend</p>

<b>Sun<sup>2</sup> Sunflare solar panels</b>	beautifully with the house. Sunflare manufactures the panels in custom sizes to precisely match your roof. And the panels provide all the energy we need.

<a href="#">Acer</a> <b>Water tanks</b>	You see a lot of Acer Water Tanks on Maui. They're great. And it's a rain forest, so it only makes sense to capture the rain.

<a href="#">Neato</a> <b>Botvac D5 Connected</b>	We named it Nigel. Nigel vacuums so we don't have to.
<a href="#">Sense</a> <b>Energy monitor</b>	An artificially intelligent energy monitor. How much energy is that coffee maker using? Sense knows.
